

ABSTRACT OF THE DISCLOSURE

5 A document displaying system for facilitating easy access to
documents being displayed. The document displaying system
includes a support assembly having a backing member selectively
couplable to a vertical support surface; a frame assembly
operationally couplable to the support assembly; a transparent
10 cover member operationally couplable to the frame assembly, and
abutting a perimeter edge of the transparent cover member; and a
pair of magnetic coupling members for selectively operationally
securing the transparent cover member to the support assembly.
